- Tractor
- Multicrop Combine Harvester
- Power Tiller
- Multicrop Thresher
- Springloaded Tiller
- Offset Disc Harrow
- Disc Plough
- Tyne Ridger
- Straw Reaper
- Zero Seed Cum Fertilizer Drill Machine
- Tractor Trailer (Tipping & Non-Tipping)

indocorpTM
AFRO ASIAN CONSULTANTS

Trailer | Tipping

It can easily be attached to various agricultural implements for carrying seeds, harvested crops, fertilizers, etc. It is available in various sizes to be fitted to any models of the tractor. It is available in 2 wheels and 4 wheels options with capacity of 2 to 20 tonnes

Power Tiller

This is a multipurpose device used for pumping, tilling, ploughing, cultivating, bund formation, peddy operation, spraying and for transportation.

Tractors

The most important equipment used in agricultural activities which covers ploughing, harvesting, transporting are done by tractors. We represent leading brands of tractor manufactures with extensive range from 25 HP to 80 HP

Trailer | Non Tipping

It is used for general purposes such as transporting agricultural inputs and harvests from farms. It is available in 2 wheels and 4 wheels options with capacity of 2 to 20 tonnes

Offset Disc Harrow

These are designed for heavy crop residue, tough soils and stubble, pasture renovation and any deep tilling requirements. They are available in two variants. One is Mounted Offset Disk harrow which is mounted on tractor and the other one is Trailed Offset Disk Harrow which is trailed by a tractor.

Disc Plough

The ploughing is an initial cultivation of soil in preparation for sowing seed or planting. Plough machine is used to turn over the upper layer of the soil and bringing fresh nutrient to the surface.

Springloaded Tiller

It is suitable for use in stone and root obstructed soil. It is designed for toughest operations.

Springboard Enterprises (India) Ltd.

Dairy Equipments

- Milk Analyzer Master Mini
- Cream Separator
- Milk Cans
- Milking Machine
- Composite Dairy Plant

Cream Separator

This machine helps to extract cream from milk. It is available from 60 lph to 550 lph. Centrifugal bowl is made of stainless steel.

Milk Cans

This comes in one piece aluminum alloy and is available in different capacities from 10 ltrs to 60 ltrs. It is built in durability, corrosion proof, Tempered, hardened & anodized cans & lid.

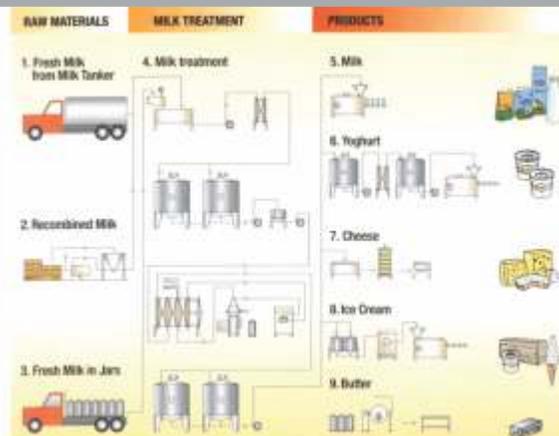

Milk Analyzer Master Mini

Milk Analyzer Master Mini is for analysis of Fat, SNF, Density, Protein, Lactose, Solids, Added water, Freezing point, Sample temperature in a sample of whole freshly drawn milk or preserved milk. Must for dairy Laboratory and milk collection centers.

Composite Dairy Plant

This plant will consist of Milk Reception, Homogenization, Heating, using LTLT (Batch) technology. The final product will be packed using manual filling & sealing system in plastic Pre-formed cups/Glass/Pouches. This unit will have provision for incubation Chamber and cold storage for the finish product the plant will come with all the utilities for heating, chilled water, and electrical for our supplies only. The plant will also come with Mini Quality control Lab.

Milking machine

Milking machine comes with different variants like manual model, electric model, & engine model. It is low cost & easy to maintain machine. Milking time is reducing to half in compare to hand milking and no spillage of milk.

Fisheries

- FRP Boats
- Aluminum boats
- Inflatable Boats
- Rigid Inflatable Boats
- Outboard Motors
- Canoes
- Inboard Motor
- Fish Finders
- Fishing Nets
- Fishing Hooks

FRP Boats

Our range starts from 4mtr upto 21 mtrs, with world class hull designs performing to the highest standards in the most adverse conditions. All our boats are made under classification. It can be customized according to customer needs.

Fish Finder

Fishing Hooks

Fishing Net

Aluminum Boats

We offer the aluminum boats by using the latest interlocked technology this superior technology eliminates the disadvantages of riveted & fully welded aluminum boats. We are the first and only boat builders to use this technology in India.

Outboard Motor

We offer OBM of different brands like Yamaha, Suzuki, Mercury, Evinrude from 2 HP to 300 HP with 2stroke and 4 stroke engine

Rigid Inflatable Boats

We are offer latest state of the art rigid inflatable Boats. These are high speed boats which are extremely stable in extreme sea conditions and are used for patrolling /rescue/relief/MOB purposes. These are V shaped GRP hull boats designed for excellent sea keeping with an option of inflatable hypalon/hard closed cell foam collars, with boat lengths ranging from 4 mtrs to 21 mtrs.

Canoes

We provide modernisation of fishing fleet by repairing & fiber lining the old wooden dugout canoe.

Cashew Nut Processing Plant

Boiler & Cooker

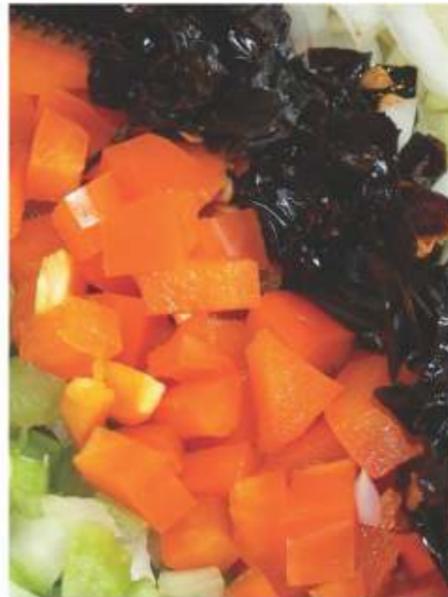

Peeling Machine

Cutting Machine

Grading Machine

Food Processing Machinery

- Fruit Mill
- Pulper
- Steam Jacketed Kettle
- Hammer Mill
- Colloidal Mill
- Hydraulic Juice Press
- Vacuum Filling Machine
- Juice Extracting Machine
- Crown Corking Machine
- Dehydrator
- Bottle Filling Plant
- Soya Milk Machine
- Cashew Nut Processing Plant

Fruit Mill

It is useful for crushing of fruit shaving thin and thick skin. It is suitable & useful for paste-making, course paste, crush, mixes, multi products crushing and pre-crush for De-hydration inputs. Stainless Steel Models are also available.

Pulper

It is designed for extracting juice and pulp from fruits & vegetables like mango, litchi, guava, pear, tomato, passion fruit, strawberry grape, chillies, pumpkin etc along with different vegetables. Stainless Steel Models are also available.

Hammer Mill

Made of stainless steel equipped with 1 to 10 HP motor to crush chillies, carrots, beetroot etc. especially for sauce making.

Hydraulic Juice Press

50 tonnes pressure, Synthetic cloth and racks will be supplied at extra cost. Tray covered with aluminum sheet, complete with 3 HP, motor and Hyd. Pump with automatic pressure control. Very useful for extracting juice from Pineapple.

Steam Jacketed Kettle

Jacket and kettle both made of 10/12 swg stainless steel mounted on mild steel stand, complete with steam pet cock, safety valve, pressure gauge. Our kettle is 2/3 jacketed so as to give most efficient working of the kettle (without steam tap). Used for heating of pulp / juice to a desired temp.

Juice Extracting Machine

Made of pure aluminum and one sieve of stainless steel with self attached starter & 1/2 HP motor. Capacity approx 800 oranges per hour.

Crown Corking Machine

Heavy duty hand operated, with magnetic cork holder table model with mild steel handle. Speed dependent on operator. Adjustable for all sizes & bottles

Collidal Mill

It is an ideal and perfect homogenizer-cum-emulsifier. It finds its application in various processes like grinding, homogenizing, emulsifying, dispersing, mixing, extracting etc. for Pulp, Juices, Syrups, Sauces, Mayonnaise & Dressings

Vacuum Filling Machine

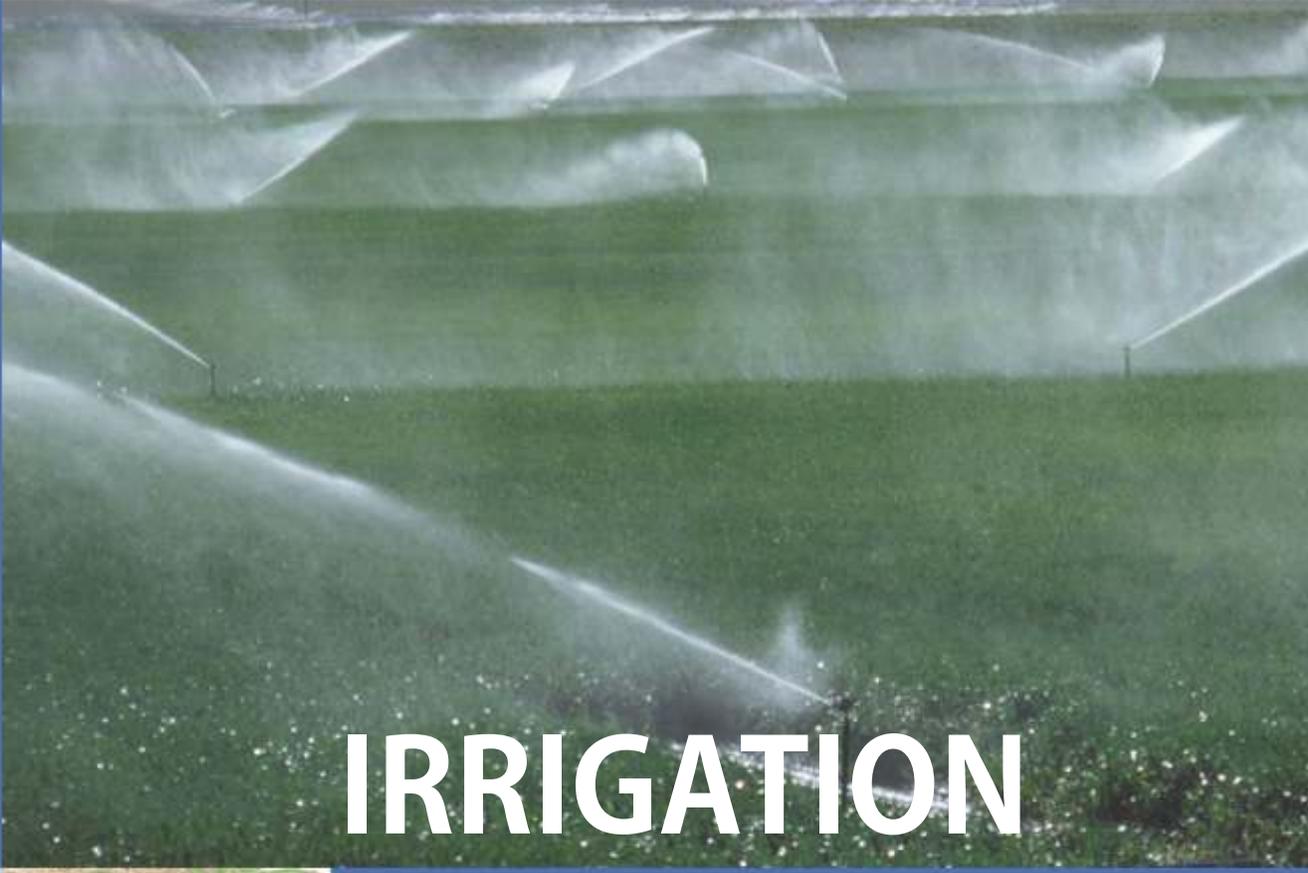

With two filling heads, complete with motor and pump, mounted on M.S. cabinet, 20/25 bottles per minutes capacity. Suitable for filling of Sauces, Juices & Syrups in glass bottles.

We also undertake supplies of various other food processing equipments.

Dehydrator
Bottle Filling Plant
Soya Milk Machine
Cashew Nut Processing Plant

IRRIGATION EQUIPMENTS

- Drip Irrigation
- Diesel Pumpset
- Diesel Engine
- Power Sprayer
- Hand Pump
- Treadle Pump
- Solar Water Pump

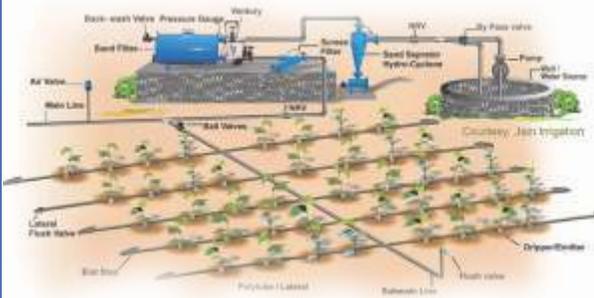

Diesel Pumpset

Centrifugal Water Pumps are manufactured to comply with latest Standard Specifications to meet agricultural, domestic and industrial application. Available from 5 HP to 12 HP.

Diesel Engine

Available in water cool and air cool high speed

Drip Irrigation

Drip irrigation system delivers water to the crop using a network of mainlines, sub-mains and lateral lines with emission points spaced along their lengths. Each dripper/ emitter, orifice supplies a measured, precisely controlled uniform application of water, nutrients, and other required growth substances directly into the root zone of the plant.

Hand Pump

Capable of drawing water from operating depths of upto 45 meters. Long and heavy handle provides adequate mechanical advantage to reduce pumping effort. Can be adapted for use with windmill or for motorized operation. Also available in 30 metre depth.

Power Sprayer

This device is use For fast, efficient,economical & large scale application of pesticides in powder and liquid form. An improved model of engine is fitted on steel tubular frame with foam rubber back cushion and shoulder straps.

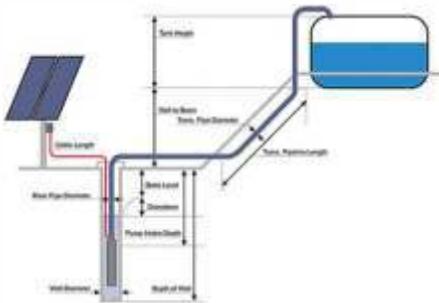

Solar Water Pump

It uses solar energy to pump water from a bore well or any water source during the day and offers an option to store water in an over head tank for use as and when required .It is an environmentally friendly technology.

The system is useful to provide 24/7 piped water supply in remote village where grid power is not available.

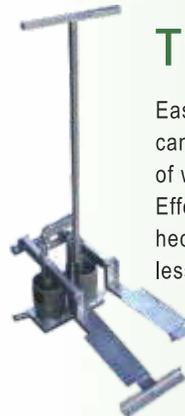

The pump delivers water directly to an overhead tank for storage and distribution.

No batteries required for power storage, hence low capital cost.

Treadle Pump

Easy to install, requires little maintenance and can easily be repaired by the farmer. The discharge of water ranges within 5000 to 7000 liters per hour. Effectively irrigates land holdings that are 0.5 hectares in size and is best suited to water level less than 15 to 20 feet below ground level.

Corn Grinder

It is use for grinding maize and operated by 8 HP B Lister type diesel engine. It comes with capacity of 250 kg per hour to 1 ton per hour.

Cassava Processing Unit

The entire unit is use for grading Cassava and making flour from it. This unit comprises of Peeler, Hydro Extractor, Fruit Mill, Cassava Grater, Grinder & Generator. It comes with the capacity of 80 kg per hour to 1 ton per hour.

Chalk Machine

It is a low cost & maintenance free machine, does not require any electric power, very easy to operate with no special technical training. It can produce 300/400/600 chinks in just 20 mins. Raw material required is plaster of paris, zinc oxide & water.

Candle Machine

It works without electric power, can produce 120-140 candles in just 20 -30 mins and the length of the candle can be adjusted. Raw material used to make candle is wax, thread and castor oil.

Packaging Machine

These Automatic machines are meant to produce center sealed pouches to pack various products as tea, rice, salt, sugar, grains, coffee, spices, chips, snacks, dry fruits, confectioneries, pesticides, detergent, pharmaceuticals etc. They pack liquid, semi soild and soild substances

Ice Cream Machine

Twin flavor soft serve machine and high output capacity with pump (increase the volume by 80%) Available in single & three phase and single or double compressors.

Nail Machine

It requires electrical power, can produce nails from 2- 6 inches of length. The full unit consists of nail machine, polishing barrel and electric bench grinder with spare parts.

Ice Cream Cone Machine

This is a high capacity machine for manufacturing ice-cream cones or cups. It is equipped with four to five rows of baking moulds. The moulds are equipped with automatic ejectors. The operation or handling of the machine is very simple and done by any skilled worker.

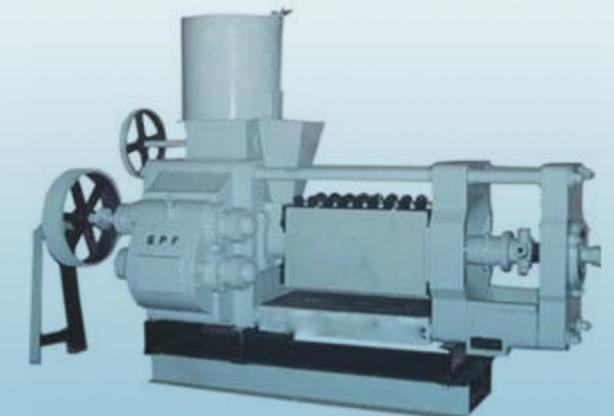

Toilet Roll Machine

This hi-speed toilet paper roll machine is available in 811mm, 1020mm & 1350 mm working widths. It also has slitting machine with perforation. Slitting blades could be adjusted to make Kitchen Rolls & Industrial Rolls. Electronic counter is provided which controls the number of sheets to be wounded over a given roll.

Oil Expeller

This unit consists of Decorticator, Oil Expelling Machine, Filter press & Baby Boiler. Suitable for extracting oil from groundnut, sesame, palm seeds, castor seeds, cotton seeds, sunflower seeds, etc

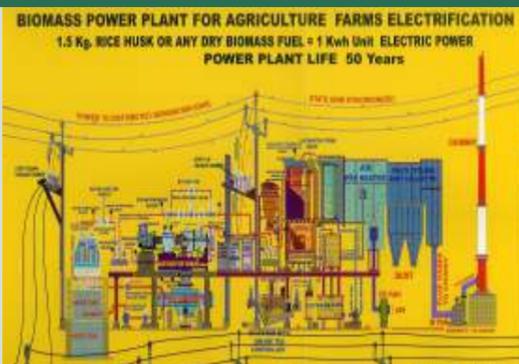

Solid Waste Transfer Station

Range of waste screening/sifting, separation, palletizing, shredding machines for solid waste sorting in cities/towns.

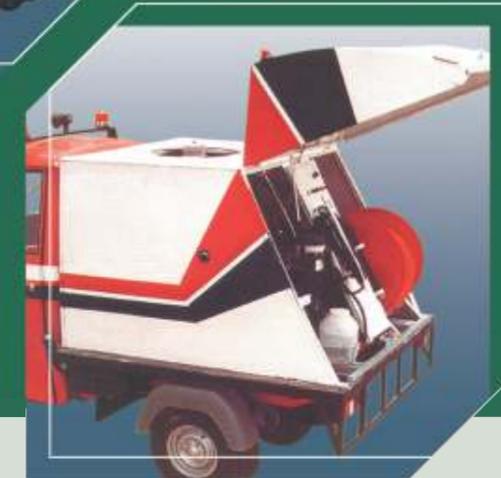

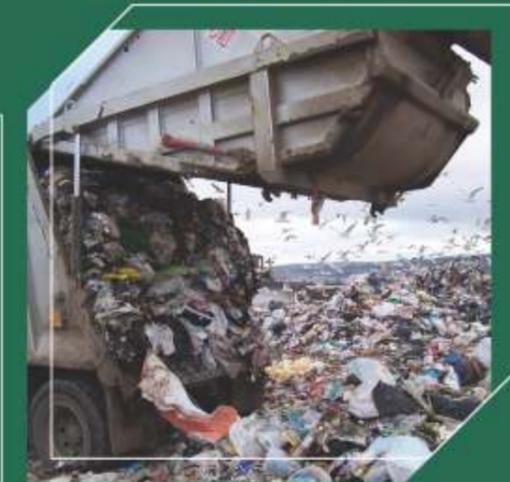

Solid Waste Sorting Plant

A wide range of waste transfer stations with largest unit capable of handling 504 Cu. M per hour of waste, static waste compactors and portable compactors.

Generation of Energy From Bio-Mass

We have complete power project of turbine, boiler with all accessories mountings, Gearbox, Condenser, Vacuum Pump, Lubrication system, Governing system, base plate cum oil tank, panel of turbine complete with Alternator set and L.T Panel.

Auto Tipper

It is a unique innovation to facilitate door to door collection of garbage and its proper disposal. This equipment can dump the garbage on the ground, as well as directly into the container and also in the refuse compactor. It is useful for small townships, city council & big factories.

Road Sweeping Machine

Works on the principle of Vacuum Suction, Machine with bag filter system are available as option, capable to sweep without any water spray, large container capacity of up to 6.5 Cu. M. Extendable side brushes and wandering brush for cleaning deposits along the road Kerbs. Wandering hose for cleaning areas outside the sweeping path.

Auto Sky lift

Complete Hydraulic Operation Used for repairing and installation of Electrical Fixtures. This can be used for better accessibility of various tall structures like electrical poles, bridges, aircrafts, overhead cables, trees etc. Max Work Height 7 to 9 mtrs.

Hook Loader

Hook Loaders are capable of handling roll-on Roll-off skip containers up to 25 Cu. M capacity. The Hook Lifter is designed to pick up loaded or empty skip containers from the ground, transport the same to dumping yard for dumping the material by hydraulic tipping of container and thereafter unload the skip.

Refuse Compactor Vehicle

It is available from 9 tons to 25 tons. Refuse Compactor Vehicle is manufactured to match each individual customer requirements suitable for practical works. High performance, economical and reliable. It offered Rear Loading Refuse Compactor with low loading edge allows manual loading of sacks and bulky materials and collection from container bins up to 1300 ltrs capacity.

Tricycle Hooper

Garbage Cycle of capacity 300 Ltr. Having bins with Lid. The Bin is made from Roto molding technique with UV stabilized Virgin LLDPE. Two rear tires are of Motor cycle type with heavy duty rim. The chassis of cycle is heavy duty to carry load of 500 kg. Proper locking arrangement for locking the tricycle is provided. The container is having the tilting provision for emptying the Bin.

Auto Multijet

A multipurpose device design to clean choked/drainage/sewer lines of 3 in. to 7 in. effectively and with the high water pressure this device can work as a small fire extinguisher and can serve the purpose of road/street washing machine, market place/footpath cleaning device, container washing machine, pesticide spraying machine and public toilets and urinals cleaning machine.

Waste Bin
