Chairman's Message

Surely a proverb states that "Sky is the limit!" But, doing "something extra" has been my heartfelt desire since engineering days! Exploring opportunities, coping with challenges, aligning to the market demand and constantly striving to broaden the company's structure, I feel delighted to say that we have been able to establish our credentials as a prima international turnkey project commencer. Beginning multiple ventures & projects in Africa, I started this company with nothing much more than a pocket full of dreams & determination; but now, it hooks me to the long rugged path leading towards prosperity. Allowing sustainable possibility and competitiveness in an ever changing regional as well as global economic landscape, we continue to rebuild our multiple segments with international standards.

Kirit Sobti

I look forward to create a niche in national as well as international business by focusing on continuous resource optimization, employment generation and revered learning programmes.

CEO's Message

Rohit Khattar

If it is to be, it is up to me! I continue to remain proud of our company that stays in adherence with accountability, corporate transparency and integrity as cornerstones in budding state-of-the-art and futuristic business solutions. Holding ourselves to a sky-scraping standard of professional and business conduct, our mission exemplifies generating adequate employment and imparting knowledge & training to the workforce for sustained economic development. An International Turnkey Project Commencer in Africa is how the organization instigated operations over a decade ago and went from one successful step to another. We are now conceited of having earned the patronage of many African countries and other international domain.

I believe that owing to our various verticals, we will be able to touch the vital sectors and provide the best possible turnkey solutions in a stipulated manner.

Who we are?

Forging its credentials as a prima international turnkey project commencer, KS Unite has been revered as a conglomerate comprising internationally acclaimed brands that are acknowledged globally for their exemplified over-a-decade existence. Working parallel with the basic fundamentals of integrity, commitment and innovation; the company maintains firm focus on resource optimization, generating adequate employment and delivering proven IT solutions.

It is proud to have earned the patronage from many African countries and has been adding more to its customer base with each passing day. Broadening up its role in each sector; the group has segregated itself into multiple ventures that include INDOCORP, LESDEP, Infratel, The Times of Africa, KIMMS, Heal & Bliss, to name a few.

vision

Strengthening the bonds of economic development by extending our expertise in variegated sectors for propagating best process practices and undertaking supplies coupled with turnkey projects.

LESDEP - Skills Center

Lets not create 'jobs' lets create 'job creators'!

A skill development initiative designed to offer training programs for people; primarily the apprentice oriented trades. By providing skill development, training facilities and other services like technology transfer, easy installment plants and credit facilities, we wish to take the economy a step ahead. One of the major obstacles in the development of an economy is unemployment. Generating skilled labor could be an effective solution for the same.

Flourishing attainments in Ghana in 2011; at Niger, Senegal and The Gambia in 2012

Skill development programs provided by us:

- ▼ Incubator setup
- ▼ Fisheries
- ▼ Food and agro processing
- ▼ Construction
- ▼ Revenue collection
- ▼ Mobile and laptop repair
- ▼ Computer training institute
- ▼ Medicine shops
- ▼ Garments and fashion
- ▼ Beauty salons
- ▼ Carpenter and electricians
- ▼ Many more industrial training

Incubator cum Training Centre & Skill Development Institutes

Joining hands to create skilled minds!

We believe in generating profitable results from all aspects. The machines that we offer consume less electricity, power & space. 20-30 machines can be easily set up in an area of 800 sq. ft. Apart from local entrepreneurs, household women & unskilled labor, all can handle the machinery with ease.

Our skills center stood up with outstanding results at Ghana in 2012

Our expertise lies in:

- ▲ Setting up the skill development institutes & incubator centers
- ▲ Providing technical know-how
- ▲ Supplying machines & equipment
- ▲ Bringing in the trainers as part of 'Train-the-Trainer' concept
- ▲ Supplying course content/manuals
- ▲ Providing spare parts for the machines & equipments supplied
- ▲ Providing maintenance & support for the centres established
- ▲ Facilitation of credit services

SKD Tractor Assembly Plant

Transferring Technology!

Sowing best seeds and generating a good yield remains useless till it is harvested properly. Tractors along with the relevant agricultural implements and machinery are among the latest technologies that should be used by all farmers. We wish to provide the same, keeping cost effectiveness in mind.

This ensures job creation, tertiary industry setup as well as development and rise of the living standard for common man.

Our success stories were weaved on the land of Kumasi, Ghana in 2008, Burkina Faso-2010-12

We teach:

- ▲ Assembly & maintenance of tractors and implements
- ▲ Optimum usage of tractors & parts
- ▲ Maximizing fuel efficiency of the tractors
- ▲ Minimal wear & tear
- ▲ Development of efficient service stations
- ▲ Facilitation of mobile service vans to:
 - ▲ Provide 24x7 customer service
 - ▲ Promote sale of genuine spares
 - ▲ Image building
- ▲ Warehouse & tool shops
- ▲ After sales support
- ▲ Job creation

Waste Management

Time calls for clean Africa!

Cleanliness and hygiene are basic but the most important factors for the development of any country. Modernizing the task of waste management with equipment like Compactor Truck, Suction cum Jetting Machine, Road Sweeping Machine, Auto Tipper and many more, we wish to make cleanliness a priority.

In collaboration with Zoomlion Ghana Ltd., we have been able to gain success in Ghana, from 2007 till date

We provide:

- ▲ Waste Management Equipments
- ▲ Solid & Liquid Waste Management Solutions
- ▲ Power Generation
- ▲ Landfill Site Management
- ▲ Transfer Stations
- ▲ Sorting & Recycling Plant
- ▲ Composting Plant
- ▲ Street & Drain Cleaning
- ▲ Cesspit Emptier Services
- ▲ Vector Control Services
- ▲ Capacity Building / Training

indocorp™

Fibre Lining of Wooden Canoes

Restoring forests & strengthening boat's longevity!

A boat with a long life is definitely a benefit for any fisherman. The wooden canoes are lined with fiber-reinforced plastic (FRP), which is a composite material made of a polymer matrix reinforced with fibers.

Our success stories were weaved on the land of Ghana, in 2010

The FRP Lining ensures:

- ▲ Longevity of boats
- ▲ Fuel efficiency of the boats
- ▲ Enhancing the stays on-shore
- ▲ Forest restoring
- ▲ Cost effectiveness
- ▲ Speed increase of the boat

I S E A R

indocorp™

Plastic Recycling

Recycling the present, saving the future!

Plastic recycling is the process of collecting plastic wastes and reprocessing the material into useful product. Usage of plastic is inevitable in this fast running world. Plastic has many ill effects on the environment and is hazardous to health. The best way to minimize the hazards caused by plastic, is to recycle it.

We have successfully initiated the projects in Ghana 2013

Advantages:

- ▲ Waste reduction
- ▲ Conservation of energy
- ▲ Save money
- ▲ Create new jobs
- ▲ Generate revenues
- ▲ Hygienic environment

Food Processing

Flavoring quality, enhancing nutrition!

Food processing is the transformation of raw ingredients into food, or of food into other forms; hence, resulting in value addition to the base product.

Food processing is used to convert inedible agricultural products into edible food items and to preserve the oversupply of agricultural products for later use. The importance of food processing is to preserve food and hence, free man from total dependence on geography and climate for providing his/her nutritional requirements. It also enables empowering of agro dependent population and assists in transforming subsistence agriculture into a full fledged industry.

We have successfully initiated the projects in Ghana 2013

Food processing has three major aims:

- ▲ To make food safe (microbiologically, chemically)
- ▲ To provide products of the highest quality (flavor, color, texture)
- ▲ To make food into forms that are convenient (ease of use)

Fruit Juice Processing Unit

Extracting; purifying; packaging!

Owing to the synergies and vital linkages it promotes between industry, economy and agriculture, processing fruits/vegetables has been counted among the most significant sectors for a nation's development. Hence, we step ahead with our crucial contribution of a technologically upgraded and semi-automatic ISO certified Fruit Processing Plant; crafted in adherence with the set quality norms of agro-chemistry and food technology. Dimensionally stable and possessing excellent durability, this machinery is broadly used for processing multiple fruits like pineapple, oranges, grapes, and tomatoes, to name a few. Moreover, we have also gained accolades in providing a complete range of professional vacuum packaging machines from the smallest table-top vacuum packer up to the largest heavy duty vacuum double chambers. Furthermore, we also offer bottle packaging machines and tin processing machines for our valuable patrons.

Our Expertise

We have exported semi-automatic fruit processing plant at Cameroon, in 2011 that facilitated employment solution and served catering needs across the nation.

Broadening Roles! Connecting Needs!

- ▲ Transferring ISO certified semi-automatic Fruit Processing Machines
- ▲ Average capacity of 1.5 tonnes per day
- ▲ Generating employment solutions and catering entire nation through the same
- ▲ Processing multiple fruits and vegetables
- ▲ Purifying and packaging solutions also entertained

Jute Bag Plant

Transferring Eco-friendly Technology!

Nature is getting sicker & sicker because of all the indescribable mishandling that we do. Jute is one of the most affordable natural fibers available. Jute bags or earth bags are naturally green. This initiative aims to help the environment by encouraging more people all over the world to use earth-friendly bags. Nowadays, people are realizing how important it is to care for the environment and most of all, care for one's self. We specialize in providing coco & cashew nuts jute bags.

The latest specimen of success for this project can be seen in Ghana in 2013

What we provide:

- ▲ Supply of jute yarn & jute clothes
- ▲ Supply of all types of machines required for jute bag plant
- ▲ Manpower and technology transfer

indocorp™

Modernizing the Fishing Industry

Coupling traditions with technology!

Fishing is one of the oldest professions, which is passed on to one generation from the previous. In the modern age, technologies can add a lot to the fishing industry. With the popular delicacies of sea food, the fishing industry has been to gain a lot. The security of a natural resource can also be improved by taking care of waterways.

Some of our services include:

- ▲ Supply of FRP fishing boats, patrol boats, speed boats, surveillance boat
- ▲ Supply of engines & outboard motors
- ▲ Fish processing & cold storage
- ▲ Deputation of experts for the training of local fishermen

indocorp™

We convert a renewable resource like sunlight into electricity, as we believe, nature has all the solutions. Our areas of application include Street & Home Lighting, Water Pumping, Community TV, Lanterns, Medical Refrigeration, Battery Charging Systems, Rural Telecommunications, Railway Applications, Zero OPEX Solar Powered GSM for rural networks and many more.

Our broad spectrum of services includes:

- ▲ Site surveys & feasibility studies
- ▲ Design & engineering support
- ▲ Manufacturing, commissioning & installation
- ▲ Technical maintenance support

indocorp™

Ports, Harbours & Inland Waterways

Transforming doorways and channels of the land!

Airports and sea ports play a great role in the boosting of economy. Facilities like Ports, Harbors & Inland Waterways can improve it even more. There are many progressive ideas to do the same.

What we can provide:

- ▲ Investment analysis of BOOT, BOST, BOLT port projects
- ▲ Container transshipment terminals
- ▲ Topographic, hydrographic & seismic surveys
- ▲ Construction management & site supervision
- ▲ Marine emergency response (offshore-onshore oil & spill response, usage of barges, underwater salvage & diving)
- ▲ Environmental preservation
- ▲ Coastal security
- ▲ Firefighting & decontamination

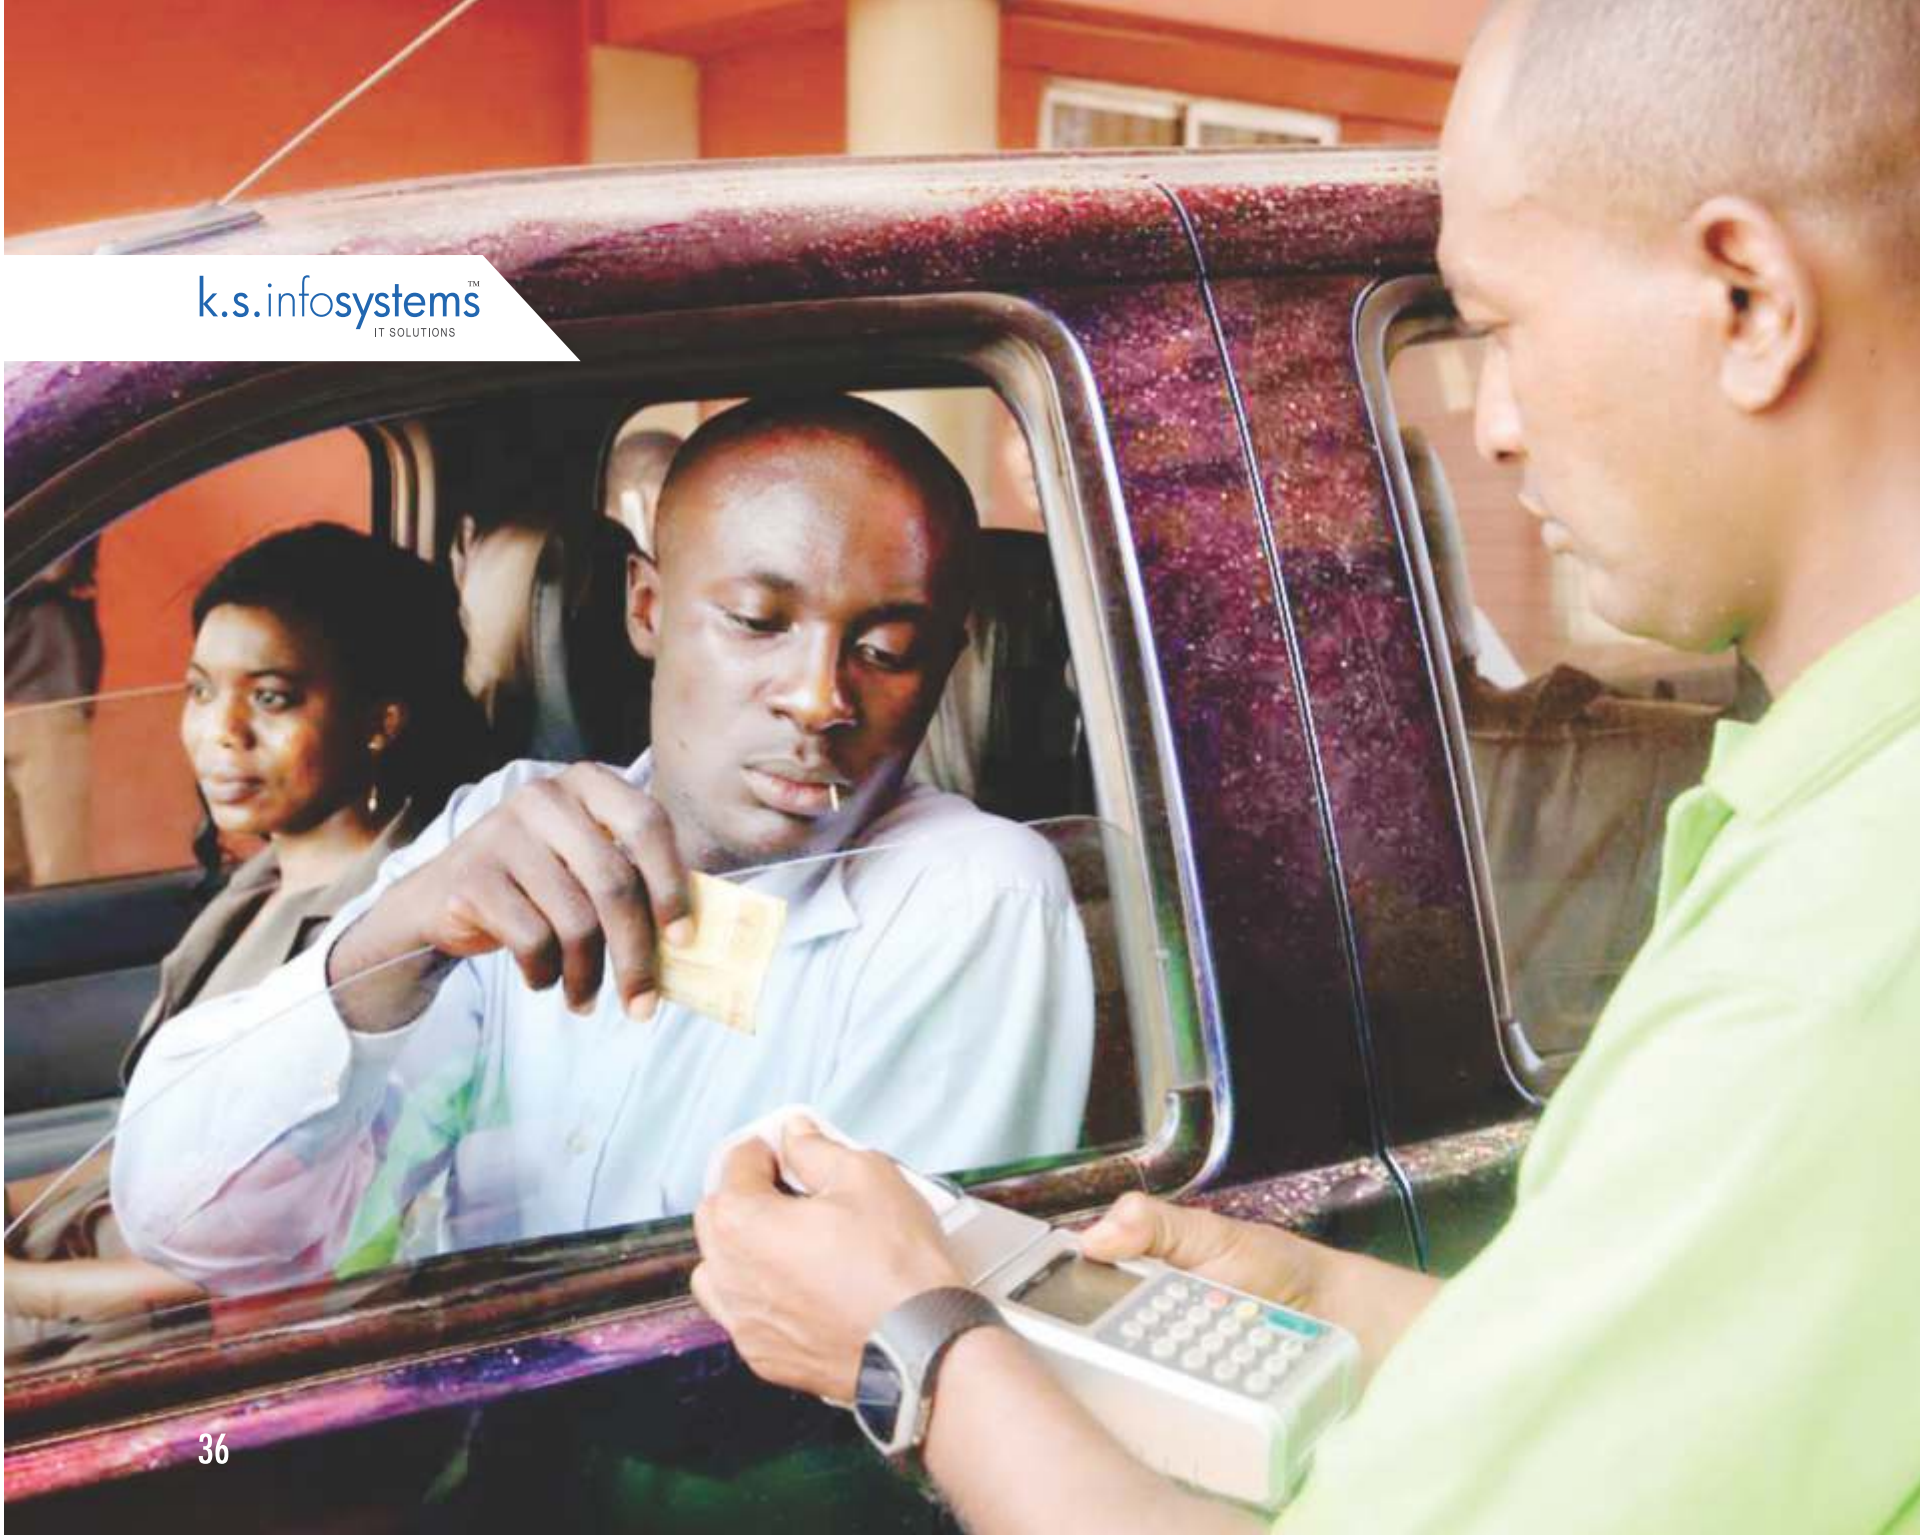

Waste Recycling Plant

Embracing Eco-friendly Resolution!

Plenty of waste is produced every year and sent to dumping yard, where it will either be buried or burned. But, recent studies show that approximately 75% of produced waste can actually be recycled. Following an important part in the modern approach to waste management, our strategy includes segregating, recycling and providing a basic fix to the product for its reusability. Keeping cleanliness and hygiene as a basic priority, we strive towards delivering technologically upgraded Waste Industrial Plant & related machines as well as quality assured project management services in adherence with the specific demands of our esteemed patrons.

Our Sharing:

- ▲ Waste Management Equipments
- ▲ Composting Plant
- ▲ Solid & Liquid Waste Management Solutions
- ▲ Street & Drain Cleaning
- ▲ Power Generation
- ▲ Cesspit Emptier Services
- ▲ Landfill Site Management
- ▲ Vector Control Services
- ▲ Transfer Stations
- ▲ Capacity Building / Training
- ▲ Sorting & Recycling Plant

Municipal Revenue Collection

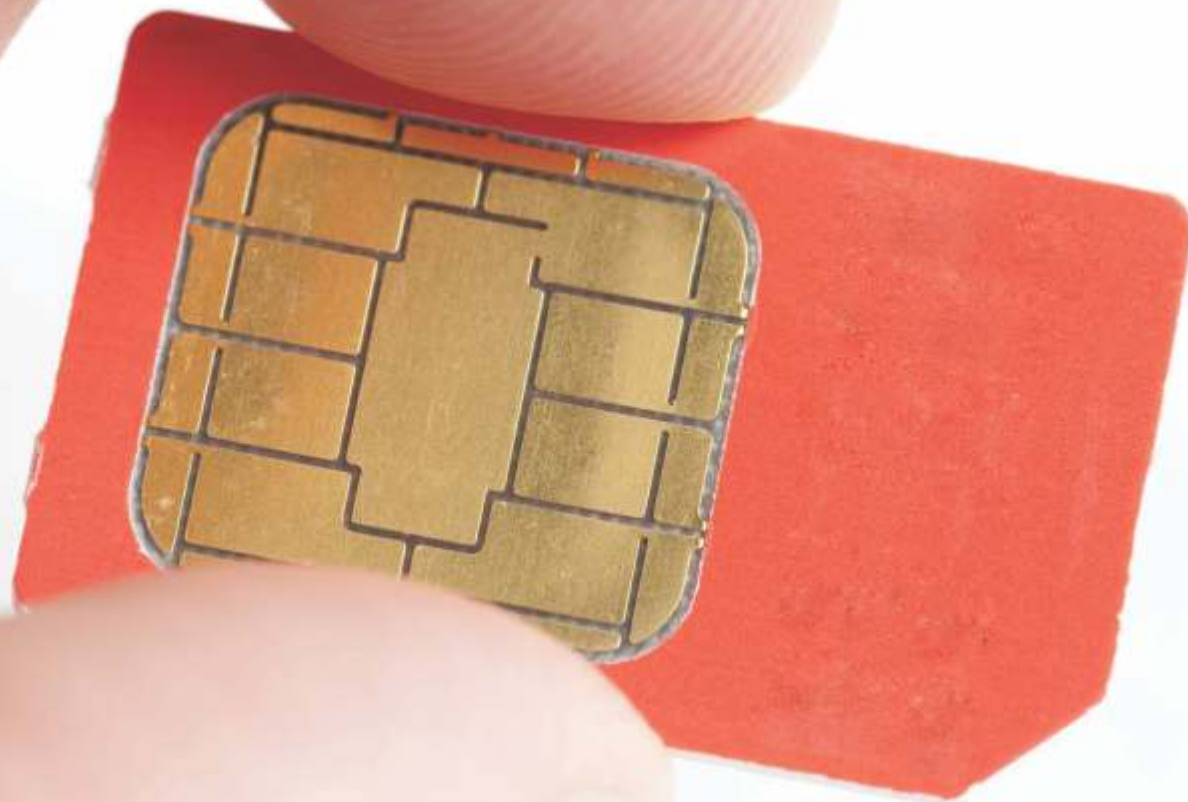

Collecting resources for reforms!

A proper Revenue Collection System takes the economy forward, to a more regulated form. It is useful in areas like Government and Revenue Department, Financial Institutions, Medical & Healthcare, Retail & FMCG, Inventory Management, Transportation, Tourism and Telecommunication. We dream for a progressive economy.

We have records of establishing such systems in Ghana-2007 and DR Congo-2013

Our actions:

- ▲ The collector carries a Handheld Terminal (HHT)
- ▲ Visits on a specific time interval to the shops
- ▲ Collects the shop tax from the shopkeepers
- ▲ Enters the data in HHT
- ▲ HHT confirms by giving a receipt through an inbuilt printer
- ▲ Receipt is given only by the MSR identity cards wipe
- ▲ The collector comes to the data centre on specific intervals
- ▲ Plugs the HHT into the cable
- ▲ Deposits the cash collected from the shop with a receipt
- ▲ The data is transmitted to central location through WEB/Internet
- ▲ Boosts economy and leads to infrastructural development

Telecom Revenue Monitoring

Efficient taxation, reliable services!

As mobile usage is increasing world wide, talktime taxation can help the Government and general public as well. Government and Telecom Regulation Agencies (TRA) should implement a rigorous monitoring system that will enable Government to independently collate, from the billing engines of the mobile telecom operators and the Call Detail Records (CDR) of each call logged by their billing engines. Our beneficiary areas of applications are Security Agencies and departments like Police, Justice, Customs, Immigration, Traffic, Income Tax and Telecommunications Department.

Our success stories were weaved on the land of Ghana, in the year 2009

Our expertise:

- ▲ Distributed and scalable multi-threaded architecture
- ▲ Capability to support various diverse networks and billing technologies
- ▲ Real-time operational tool
- ▲ Robust protocol connectivity bridge
- ▲ Easily adaptable to new versions upgrades
- ▲ Flexible and easy-to-use GUI
- ▲ Ensure security of the data
- ▲ Boosts economy and leads to infrastructural development

Crowd Management

Introducing I-Ticketing Globally!

Crowd management at big events is a challenge and requires quite an effort. Stuffed with features like local & Internet sales of tickets, logistics & management, entrance control and customization & ticket design, we successfully brought in the concept of I-Ticketing.

We have imprints of our accomplishments for managing the I-Ticketing for MTN CAN 2008 Football tournament held in Ghana

We successfully managed the:

- ▲ Survey of Area
- ▲ Analysis of Data
- ▲ Turnstile Gates
- ▲ Printing of Tickets
- ▲ Installation of Equipments
- ▲ Controlling & Managing Crowd
- ▲ Security Checks on the Ticket
- ▲ Completely Eliminating Privacy

Tourism Revenue Collection

Packaging produce for better returns!

Tourism is one of the main sources from which government can derive tax revenue. It is one of the world's fastest growing industries as well as major source of foreign exchange and employment for many developing countries. Many countries have intensified efforts at promoting the growth of tourism through the application of robust tax regimes. Given the growing demand for access to protect natural areas by tourists, it is increasingly important that adequate pricing mechanisms are implemented to ensure that recreational opportunities contribute to bio-diverse conservation. A proper tourism revenue collection system provides most appropriate mechanism to generate revenue.

We have successfully initiated the projects in Ghana 2013

We provide:

- ▲ Technology transfer
- ▲ Employment generation
- ▲ Training
- ▲ Equipments
- ▲ Provides a facility to save & archive reports
- ▲ Provides high level security & access control for secure hosting of data

Bio Metric & Smart Card Based Payroll Systems

Squeezing proximity; enhancing accuracy!

Technologies are there to make our lives easier. The areas we can help in are Allowance Management, Banking systems, National Identity system, Govt. Subsidiary System, Criminals Identity System, Licensing System and Electoral System. The advancements will prove to be profitable in every sense. The various states of Ghana are the places, where we showered our excellence.

We have successfully initiated the projects in Ghana 2012

What we provided:

- ▲ Maintenance of employees' records with basic/official details
- ▲ Generating the employees' allowance
- ▲ Unlimited storage capacity
- ▲ Web server management
- ▲ Customized reports as per the client's need

ICT HUB Computer Community Centre

Global relations with technology leaders via IT products assembly plant!

Learning computers is a must to become competitive in the present scenario. ICT HUB provides facilities which let computer education spread its wings all over the community, especially in government bodies and educational institutes. We have our success stories in numerous states of Ghana.

We have successfully setup ICT Hub in Ghana, 2010-12

We:

- ▲ Trained the youth to create employment
- ▲ Provided the infrastructure and the equipment
- ▲ Provided holistic ICT services to the community such as
 - ▲ ICT Training for Govt. employees, tertiary students & school children
 - ▲ Assembly of mobile phones and PC
- ▲ Facilitate exchange programs
- ▲ Dealers in IT and high technology equipment

Integrated Customs Processes

Making taxation simpler and systematic!

We offer a web portal, which provides a user friendly interface to allow carriers/shipping agents, clearing agents, banks, inspections services, insurance agencies, Government bodies and other stakeholders to lodge their data online.

We achieved accolades in Dakar, Senegal in 2012, Ghana and Guinea Conakry in 2013

We:

- ▲ Simplify and harmonize customs procedures
- ▲ Introduce new technologies in the Government administration for standardization (WCO, WTO, UN/CEFACT)
- ▲ Connecting all the stakeholders through a single platform
- ▲ Detection of frauds and under-declaration
- ▲ Ubiquitous availability of information
- ▲ Enabling a paperless process

Vehicle Tracking

Track your vehical location!

Being able to know every single detail about your vehicle at any given time helps in managing our moving assets. The potential segments where we can use such technology are education, transportation and logistic companies, infrastructure and mining companies, automotive leasing and car rental firms.

Ghana, in the year 2007 witnessed our success in the project

Our Highlights:

- ▲ Viewed real-time location of your vehicles
- ▲ Fuel and thermal sensor
- ▲ Established routes and rules to alerts
- ▲ Tracked mileage and measure distance from key on to key off
- ▲ Generated a range of MIS reports
- ▲ Alerts for various mechanical warnings
- ▲ View the vehicles from anywhere anytime
- ▲ Speed restrictions
- ▲ Geo fencing
- ▲ Security related features
- ▲ Complete security system
- ▲ Gradual stop function jamming protection

Video Conferencing

Conferring faster and simpler!

Interacting face-to-face makes the communication better. Video conferencing helps to minimize confusions, saves time and reduces cost involved. We can be helpful in day-to-day communications like teleworker integration, staff & regional meetings, training & education and mission critical communications like Operation Centers, Command and Control also Programs and Projects where Synergies exist and require agencies to interact. Such programs were held successfully by us in our own country, India.

The latest specimen of success of this project can be seen in Ghana in 2013

We focused on:

- ▲ Commercial grade technology that works well even over general purpose IP networks
- ▲ Latest video conferencing technology (H.264 SVC)
- ▲ Works over any IP converged networks (Intranet, Internet, Shared LAN, Wi-Fi, 3G)
- ▲ Multiple devices can be connected to video conferencing
- ▲ Easy to setup and use
- ▲ Reliable and available
- ▲ Virtually maintenance free system
- ▲ Video Replay
- ▲ It connects H.323 and SIP-based infrastructure
- ▲ Support critical features like H.239 data sharing and H.235 media

e-Classroom

Electronically yours!

Today's higher education institutions are challenged to prepare students for a future in a truly global economy. Competition is fierce and expectations of students and educators are enormous. Education also demands a cost-effective and environmentally-friendly approach to bridge the distance between metropolitan campuses and institutions spread across continents.

Ghana, in the year 2012-13 witnessed our success in the project

Features:

- ▲ Increasing enrollment/revenue
- ▲ Increased competition
- ▲ Improve productivity and efficiency
- ▲ Provide safe and secure campuses
- ▲ Reduce cost, time and carbon emissions

Setting up TV Station

Replicating reality; not fictions!

Acting as a decisive instrument of modern social and political organization, Broadcasting has been well-acknowledged and addressed as an important means of communication for its capacity to reach widely. Rapidly rose to compete with its older radio-broadcasting sibling, television programming medium appears to be quite appealing as it resembles real life with its content, surround sound and colorful images.

Budding with the same approach, our constant endeavor and striving efforts have been made to begin with a multifaceted TV Network Station. Planning to commence it with the advent of satellite and digital analogs, this station will be a single programmer providing news & network affiliated programming across the nation.

Systems in Action!

- ▲ Expanded studio
- ▲ Electronic field production equipment
- ▲ Production house
- ▲ Direction & digital work
- ▲ Studio talkback
- ▲ Tapeless systems & control rooms
- ▲ Documentaries
- ▲ News
- ▲ Talk shows

Patient Referral for Medical Tourism

Medical facilitator for a healthier, happier & stable world!

Heal 'n' Bliss facilitates international patients in getting world class diagnosis and treatment facilities for all types of medical and surgical conditions at third world prices. We provide services wherein there is no unnecessary waiting period and accommodation related hassle.

We have gained accolades for offering medical care and wellness packages in Africa

Service:

- ▲ Our Medical Board analyzes patient's reports to recommend best available treatment options and estimated cost free of charges and without any obligation.
- ▲ Patient is received at the airport by our dedicated executive and taken to the hospital or to the place of accommodation
- ▲ Pre-hospital consultations with doctor, hospital admission etc is facilitated by the Executive.
- ▲ Post treatment, our executive arranges all follow-up visits
- ▲ Help in acquiring medical visas
- ▲ Holistic treatment & alternative medical therapies like Herbal Medicine, Ayurveda, Spa & Naturopathy are also available at competitive costs

Setting up of Diagnostic Centres

Diagnosis at your footsteps!

Diagnosing an ailment and disorder at the earliest makes the treatment half done. Heal'&'Bliss aims to support development of quality health care facilities in setting up the diagnostic centres and hospitals in your country. We bring in the latest world class technologies and equipment to make quality health care affordable and accessible to the common man.

What we do offer:

- ▲ Consultancy services and expertise for setting up of hospital and diagnostic centers
- ▲ Best human resources to establish and run the healthcare institutions
- ▲ Upgrade and modernize the existing diagnostic centers and hospitals
- ▲ Training the manpower to upgrade their knowledge and skills
- ▲ Equipment studies and needs analysis
- ▲ Planning, design, implementation, construction, and delivery of civil works & equipment projects from start to finish
- ▲ Progress monitoring and status reporting of construction projects, equipments, deliveries and installations
- ▲ Technical evaluation, delivery, installation and initial start-up/monitoring of new and refurbished equipments and machinery
- ▲ Warranty on infrastructure, installations, equipments and annual maintenance contracts (AMC) for required periods
- ▲ Hiring, training and certification of employees working onsite or operating any newly installed equipment

Setting up of Telemedicine Facilities

Healing by diagnosis, treating with prevention!

Heal'&'Bliss along with its partner hospital has taken a plunge in proliferating diagnosis and treatment services through tele-medicine supported by our associated world class accredited hospitals .

We offer:

- ▲ Consultancy services and expertise for setting up of hospital and diagnostic centers
- ▲ Best human resources to establish the healthcare sector
- ▲ Upgrade and modernize the existing diagnostic center and hospitals
- ▲ Provide the modern equipments to undertake all the diagnostic tests
- ▲ Provide adequate paramedical staff for optimal operations of the medical center
- ▲ Establish a central collection hub in the city and setup collection points for diagnostic center throughout the country

Establishment of Super Specialty Hospital

Healing Services for Blissful Life!

We aim to support the medical treatment procedures by setting up the diagnostic centre, hospitals and bringing in the latest super specialty technology for treatments and diagnostics for the common man in your country.

Heal'&Bliss would like:

- ▲ To establish state-of-the-art super specialty hospital
- ▲ To bring in the best human resources for modernizing the healthcare sector
- ▲ To upgrade and modernize the existing diagnostic centers and hospitals
- ▲ To provide adequate & well trained paramedical staff for optimal operations of the medical center
- ▲ To establish a central collection hub for diagnostic in the heart of the city and setup collection points for diagnostic centers throughout the country

Wellness Centre

Rejuvenating the Self!

Get away from daily hustle-bustle life & prepare to get pampered with the Wellness Center that is basically designed & meant for the conditioning of good physical and mental health of one's self. Centre helps to retreat body, mind & soul. It provides systems of medicine and therapies all under one roof including Ayurveda, Homeopathy, Naturopathy, Yoga, Massage Therapy, Acupuncture, Reflexology and Water Therapy . These types of centers bring peace in our inner souls & help the body to come out from busy day to day life & experience the nature. Preventative wellness is the mantra for the center because we know "Prevention is Better than Cure".

We offer:

- ▲ Fully equipped wellness centre with facilities: sauna, jacuzzi, spa & sun bath to bring in energy & rejuvenation of the mind & body
- ▲ Massage rooms help to relieve from tiring muscles
- ▲ Prayer rooms which bring closeness to god & inner self
- ▲ Landscape & garden area are eye appealing
- ▲ Beautiful scenery brings smile on your face
- ▲ Sessions on healing with meditation & music which makes the mind peace & refreshing
- ▲ All in one centre that improves blood cells, vitality of organs illness & rejuvenation

Y.A. INTERNATIONAL

Supply of Medical Equipment

Supplementing healthcare with technology!

From patient care to the latest healthcare equipments, Heal'&'Bliss has everything to serve the healthcare sector. We are authorized representative of various International and Indian brands having wide range of world class quality hospital equipments. We provide assistance to find the medical equipment they need. Our expertise lies in providing the best quality, new and refurbished medical equipment in the industry at the best prices. We participate in the local tenders for supplies of the medical equipment.

We provide:

- ▲ Surgical equipments
- ▲ Lab and hospital consumables
- ▲ Instruments
- ▲ Clinical instruments
- ▲ Disposables
- ▲ Hospital furniture
- ▲ Diagnostics

Y.A. INTERNATIONAL

Supply & Setting up of Pharmaceuticals Industry

Supplying liquids, syrups and antibiotics!

Pharmaceutical is the most prominent element in the world of healthcare. We offer best pharmaceuticals and allied products at the most economical prices. Heal'&'Bliss is authorized by various pharmaceutical manufacturers to provide its services to meet your requirements in generic, branded allopathic and herbal medicines. We also assist in setting up manufacturing plants for the pharmaceutical needs.

Our areas of efficiency:

- ▲ Procurement & supply of drugs
- ▲ Getting the drugs manufactured in India as outsourced facility
- ▲ Facilitating the establishment of drug manufacturing units
- ▲ Supply of the pharmaceutical manufacturing and other equipment
- ▲ Supply of other logistic services like manpower, to name a few

KS Institute of Media and Management Studies

Train your Passion!

KS Academy, having been one of the biggest success stories – has set up a state-of-the-art mass communication & Media school in New Delhi, India christened as KS Institute of Media and Management Studies (KIMMS). The institute is equipped with modern multi-cam studio set-up, matching production control room (PCR) and non-linear edit suits. Since, we are aware of the fact that nothing is possible without a proper IT base, we are joining hands with CADD Center, Chennai to make the media school more broad-based, multi-purpose, unique and complete in all respects. KIMMS is now determined to spread its wings and replicate this successful endeavor in various parts of the world.

Scope of services:

- ▲ Foreign students pursuing varied media centric and IT programs
- ▲ Hands on training workshops for diplomats from various countries
- ▲ More than 100 students have been certified since inception in the year 2012
- ▲ KIMMS network centre in various African countries
- ▲ Student information centers in different regions of the continent
- ▲ Promote ICT training worldwide
- ▲ Summer training programs for media professionals

KS Consult provides assistance to universities / institutes in India and abroad to foster alliances and take definitive steps towards global education.

The division is harnessing new alliances among the institutes / colleges / universities of international repute across the world. We have entered into strategic agreements with institutions to collaborate in various career oriented programs and projects for promoting qualitative education.

The collaboration will help the students to have internationally acclaimed degrees in various fields of education in India and promote India as a preferred education destination.

Our achievements:

- ▲ Promoted India as a preferred education destination in West African nations
- ▲ Assisted students in securing admissions in best universities of Delhi/NCR region
- ▲ Student information centres in Ghana, Gambia, Senegal and Burkina Faso
- ▲ Linking universities of Africa and India
- ▲ Dual degree facilitation for students studying in Africa under credit transfer system
- ▲ Student information centres and counseling centres in other African nations

CADD Centre is the leading provider of CAD / CAE / Interior Design / Animation / Project Management training worldwide. It is one of the most experienced training providers and the spectrum of programs varies from basic to advanced. Anyone would agree that the act of "designing" never comes to an end. One cannot get into a situation where no more buildings, roads, bridges, cars and plans are made. As long as human race exists, there will be a thirst and search for new things and hence, new designs. Learning tools to help designers will exist and designers will keep learning them. "Every Engineer is the prospective client of CADD programs."

Our achievements:

- ▲ One of the best institutes for CAD, CAE and CAM
- ▲ MoUs with leading engineering colleges of Delhi NCR region
- ▲ More than 200 engineers certified within first year of inception
- ▲ Concept of CADD lab propagated in leading education establishments
- ▲ "Employable Engineers" for freshers while focusing on Trainability – Employability and Presentability CADD network centres in Ghana, Burkina Faso, Gambia, Senegal and Zimbabwe
- ▲ CADD network centres in Ghana, Burkina Faso, Gambia, Senegal and Zimbabwe
- ▲ Linkages with ICT centres across Africa for this largest skill development initiative

ACADEMY
The Art of Living

Establishment of Distance Learning Education

Enlightening Career!

KS Academy – fostering Afro-Asian alliances has established its credentials in the area of Education Partnership programs in many African countries. Our current focus lies in providing assistance to Universities & Institutes in India and to establish themselves in African countries to foster alliances and take definitive steps towards global education. KS Academy widens up the scope of education as it has tie ups with leading Indian Universities.

What can we offer?

- ▲ Tie-ups with esteemed universities
- ▲ Facilities to provide education material
- ▲ Readily available references
- ▲ Providing educational course at your doorstep
- ▲ Establishing distance learning centres

AFRICA INSTITUTE OF SANITATION & WASTE MANAGEMENT
KNUST

Institute of Sanitation & Waste Management

Technically Healthy Living!

The dream will be true, when each one of us will take responsibility to maintain the cleanliness of the country. Its urgent need for Africa to change its thinking & attitude towards waste and collectively explore new ways of adding economic value to waste. It is business of Waste-to-Wealth. In the African Institute of Sanitation & Waste Management, we learn the latest & most scientific techniques to convert "Waste to Utility" produces.

What can we offer?

- ▲ Modern teachings
- ▲ National psyche & body politic
- ▲ Practical & theory based studies
- ▲ R & D facilities to new technologies

Studio One, an all-equipped production house is a modern multi-cam studio set-up with matching production control room (PCR) and non-linear edit suits is well equipped for conducting interviews, making corporate videos, documentary shoots, television program and chat shows.

We at Studio One have a team with years of industrial exposure which is trained by the best in the industry. We are specialized in corporate films, documentaries, studio multi camera setups, promos, educational videos, advertorials and infomercials. In addition to it, this high definition media production house is well renowned for its exemplified media partnership solutions. Studio One puts great emphasis on research and pre-production activities so that the solutions delivered are unmatched quantifiably and qualitatively.

What can we do:

- ▲ Conducting interviews
- ▲ Making corporate videos
- ▲ Documentary shoots
- ▲ Television program and chat shows

A boutique design firm specializing in print, web, audio, video and animation, we specialize in propagating brands with 360 degree impact, marketing and communication plan. Our approach starts with the client and culminates with the same. While we commit with energy into market research and look beyond the now, we also listen to what our clients really want or need. That's how, we design for success.

What we do:

- ▲ Print media – Presenting you on papers
- ▲ Web designing – Creating web presence which reflects you online
- ▲ Audio / Video – Featuring success
- ▲ Animation – Motions to move your brands to zenith

Mining Opportunities

Exploring the Gift of Nature!

Mining is the extraction of valuable minerals & other geological materials. Mining techniques can be divided into two excavation types: Surface Mining & Sub Surface Mining. We offer many mining opportunities to companies as per minerals they are interested in to carry out .

What all we can do?

- ▲ Archeological, geological & geotechnical investigation of many sites
- ▲ Mineral identification as per clients' need
- ▲ Identification & supply of heavy machinery and equipments
- ▲ Capital & strategic planning – bidding for many sites
- ▲ Regulation & governance rules of the land

Industrial Park

Providing industrial setups to manufacturers!

Having a different and appropriate area for industries is beneficiary for industries as well as residents. Development of SEZs, Free Zones & EOUs is our idea to lead towards development. This project aims to achieve by-product synergy.

How is it advantageous?

- ▲ Located at the outskirts of a township
- ▲ Transportation access to highways, railways, airports, and seaports
- ▲ Concentration of dedicated infrastructure
- ▲ Adequate sharing of resources: water, drainage, energy & infrastructure
- ▲ Increased economic gains & environmental quality
- ▲ Easy business co-operation
- ▲ Cheap and easy labor availability
- ▲ Low production cost

Power Engineering

Brightening homes!

Electricity literally powers up the development of a nation. The non-renewable resources can prove to be a boon. We carry a vision to undertake Thermal Power Projects, Hydro Power Projects, Transmission & Distribution of Power, Rural Electrification and Non-Conventional Sources of Energy with a clear mission of bringing in development.

What all we can do?

- ▲ Geological & geotechnical investigations
- ▲ Design engineering
- ▲ Environmental impact assessment
- ▲ Environmental management plan-implementation phase
- ▲ Small hydro, solar & tidal power
- ▲ Rural and urban electrification
- ▲ Equipment supplies and installations
- ▲ Setting up of power transmission line

Block Farming

Modernizing farming practices!

New methods are always useful, especially in matters like agriculture. Introducing concepts like land identification, crop & seedling identification and warehouse for storage, our aim is to take agriculture to a new level so as to achieve best results.

What we can provide:

- ▲ Fertilizer utilization & know-how
- ▲ Tractor for ploughing the farm
- ▲ Harvesters & farm implements
- ▲ Irrigation services including borewell, sprinklers & drip irrigation
- ▲ Electricity
- ▲ Drinking water
- ▲ Proximity to marketplace
- ▲ Proximity to main highway, sea port & airport
- ▲ Proximity to canals & other waterways
- ▲ Solar equipped houses with basic accommodation facilities
- ▲ Medical facilities
- ▲ Technical support & hands-on training

Agromet Campaigning

Predicting greener weathers!

AGROMET is a Government of India initiative, an exhibition & campaign pertaining to weather forecasting for the farmers. With the development of crop-weather studies & preparation of crop and many more ideas, we have a vision to push the agriculture sector towards an advanced level.

The divisional activities, we can perform:

- ▲ Pest & disease control
- ▲ Dry farming agriculture
- ▲ Evapo-transpiration
- ▲ Agro climatic information
- ▲ Crop modelling & yield forecast
- ▲ Crop weather and draught studies
- ▲ Services of research & training for farmers

Natural Resources Management

Conserving natural wealth of a nation!

The natural resources are the best gifts to mankind, but are on the verge of getting exploited. Managing them correctly and at the right time is the need of the hour.

What ideas we have:

- ▲ Soil survey & land capability evaluation and planning
- ▲ Integrated management plan for watershed development
- ▲ Joint forest management & preparation of micro plans
- ▲ Rain water harvesting & water conservation
- ▲ Master plan preparation for natural resources
- ▲ Wasteland development
- ▲ Catchment area treatment plan
- ▲ Water logging & agriculture drainage
- ▲ Monitoring & evaluation of soil & water
- ▲ Soil moisture conservation
- ▲ Tender document preparation & evaluation

Water Desalination

Channeling clean and fresh water!

We aim to provide clean & fresh water supplies from challenging water sources. With solutions like Low Temperature Thermal Desalination, Reverse Osmosis, Multi Stage Flash Desalination and Multi-Effect Desalination, we wish to eliminate the problem of water shortage.

What advantages can be drawn:

- ▲ Used for human
- ▲ Consumption or irrigation
- ▲ Availability of water in areas of drought
- ▲ Acts as an alternative source of water

Road & Highway Engineering

Building country lifelines!

Roads and highways are the basic part of infrastructure and play a great role in making the life of the gentry simpler. With appropriate designs of piles, wells, piers, abutments & decks, we offer to build proper roads and highways to contribute in the foundation of a developing nation.

What we can provide:

- ▲ Cross drainage works
- ▲ Road failures & remedial measures
- ▲ Design consultancy of railway tunnels
- ▲ Construction supervision
- ▲ Maintenance & repairs
- ▲ Plant, equipment & machinery
- ▲ Bridges & culverts
- ▲ Railways over bridges

Low Cost Housing

Building 'homes' not 'houses'!

We have clear mission of "Home for All". Proper housing should be accessible to all. One cannot neglect the factor of costing involved in the process of availing the same. After focusing on the needs and capacities of the people, we bring in the concept of Low Cost Housing.

What we can provide:

- ▲ One/two bedded apartments
- ▲ Easy structured repayment of options
- ▲ Hygienic surroundings
- ▲ Comfortable living
- ▲ Community bonding
- ▲ Common recreational facilities

Rural Telephony

Introducing communication to rural lives!

Our rural telephony solution is a unique sustainable GSM and broadband network infrastructure that enables GSM operators to extend their network in semi-urban, rural and remote locations, where rolling out traditional networks is an unviable proposition.

This state of the art solution is ideal for deployment in areas with limited or no grid power and a large number of coverage holes in the network. Designed to run independently on 100% solar power, the base station delivers a profitable business case that redefines ROI on network infrastructure.

What can we do?

- ▲ Introduce cost optimized solution offering low total cost of ownership (TCO)
- ▲ Give access to integrated broadband Wi-Fi data capabilities option
- ▲ Propagate a very low power consumption unit for all round connectivity specifically for connectivity in rural and remote areas
- ▲ Operational in rural/semi urban areas across the world

Dry Port Automation & Allied Services

Valuing Partnership; Increasing Profits; Solidifying Performance!

Enhancing storage efficiency, faster material throughput and better predictability, Port Automation is a reliable delivery concept driven with smarter and field proven technology. Flanked by an industrial city, our Port will dish up as a logistic point for warehouses, transfer & haulage companies, freight forwarders and related service centre. Hence, we are moving forward to carve our footprints in the budding logistics & supply chain management diligence with custom Dry Port Automation & Allied Services across the globe.

Our expertise lies in offering inbound & outbound container movement through sea, necessary for importing goods within the country and abroad. A hidden weapon in the battle, Container Tracking Systems provide ongoing monitoring of container through all the checkpoints and stations on its journey, from the factory till its final destination. Moreover, we also undertake handling and importing operations, irrespective of merchandise; containerized or conventional. Real-time data solutions achieved through container tracking system and custom automation enable enhanced productivity coupled with better results.

Tracking; Monitoring; Managing!

- ▲ Importing goods from variegated countries through sea in containers
- ▲ Custom port automation and allied services
- ▲ Container tracking system and embedded support handling department for tracking all containers that are coming in
- ▲ Border post automation

ageing gracefully

Ageing gracefully

Caring Veterans!

The establishment works with an aim to provide the dignity & privilege to aged people. It deals with the special needs, emotional security and above all social protection.

It is a perfect abode where all facilities and comforts are tailor-made to ensure complete physical, mental and psychological well being of the elderly. The last phase of a rewarding journey has to be most satisfying. The veterans invested many precious years in bringing up and gaining a status in society. Our objective is to make the earnings eternal and everlasting. The motive is to create more equal and sustainable world for elders. This is a place for people who put a premium on their independence and take pride in the life of dignity they have led.

What can we do?

- ▲ Mobile health units for areas with limited access and poor transportation facilities
- ▲ Physio care and eye care camps for the elderly
- ▲ Elder helplines to solve problems of elders such as isolation, neglect, facilitate emergency responses
- ▲ Livelihood support to restore their financial stability
- ▲ Old age homes/day care centers for older people, who don't have a roof over their heads or a place to call their own
